The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 46-49 are rejected under 35 U.S.C. 102(b) as being anticipated by Prest, Jr.

Prest, Jr. discloses optical disks comprising blends of polystyrene and polyphenylene ether. Optical disks are seen as necessarily being produced by at least one of the methods recited in claims 46 and 48. Applicants' limitations to the polymeric material having been isolated by specific filtration/concentration processes is not seen as imparting patentability to the rejected claims. Applicants need demonstrate patentably distinct properties necessarily flowing from the process limitations.

Claims 1-45 are allowed.
